The Approach

What was the scope of their involvement?

Andromeda quickly jumped on board and worked to understand the project's progress after taking over from a previous company we used.

They've since reignited the project. We've also used them to migrate data from Google Drive to the SharePoint environment and to centralize our international team on Office 365.

What is the team composition?

Andromeda has assigned a project manager and a senior technical lead to work with us. Their CEO oversees the project, and we also work with their support staff.

How did you come to work with Andromeda Technology Solutions?

Andromeda took over the engagement from another company. That vendor sold their Microsoft business to the Andromeda team.

What is the status of this engagement?

We started working with Andromeda in August 2021, and the engagement is ongoing.

The Outcome

What evidence can you share that demonstrates the impact of the engagement?

Andromeda has migrated our data without issues, and user accounts have been up and running. Overall, we've had a seamless transition from one environment to another without any problems. At present, any ongoing issues are resolved within 24 hours.

How did Andromeda Technology Solutions perform from a project management standpoint?

Everything has been great. Their project manager recaps our progress and schedules every meeting.

What did you find most impressive about them?

Andromeda's people are the most impressive part of working with them. They're a truly great team; their resources are responsive and kind, and they go above and beyond our expectations. Overall, we're truly happy with them.

Are there any areas they could improve?

They don't provide estimates for the next phase of our work as quickly as possible. To be fair, they're great at dealing with our current work.

Do you have any advice for potential customers?

Use Andromeda wholeheartedly. They're great and fabulous.
